

## PHYSICS ENERGY WORK INTRO

What do the words:

Work                      Momentum                      Energy                      Power                      mean?

What are the different sources of energy?

What are the different types of energy? (Sec 5-2)    How can they be calculated?

How would you find out how much work and energy you use in a week?

Homework

Find 10 examples of work being done by/for you between now and next class and explain how you would calculate it.

Read pg 167-171 in text. Do Sec Review 5-1
